

Chisel lengths and usable limit.  
for GH-9

( 692 mm is measured from chisel holder )

(Bracket thickness is about 74 mm )

( 692-74 = 618 mm)

All the measurements are without Jackup

GH-9 = Chisel (Fx/P/E)

Overall lengths (L)	$L = 1200 \text{ mm } (47'')$
External lengths (A) w/o Jackup.	$A = 692 \text{ mm } (27'')$
External useable limit (B) w/o Jackup.	$B = 410 \text{ mm } (16'')$
Overall usable lengths (L')	$L' = 918 \text{ mm } (36'')$
